

General:

The EYD-Logo comes in two Subline varieties:

-Date: 21.-24. MAY IN DÜSSELDORF

-Church: NEW APOSTOLIC CHURCH

It must be given enough space so the top, bottom, left and right requires a rim of half the logo width – measured against the text – in addition to formatted frames or further applications.

The logo has to measure at least 55 millimetres in width.

The logo must not be placed on a coloured background or used as a negative. Also this logo is not permitted to be rotated or flipped.

Colours:

The two colours of the logo are HKS 7 for Orange and HKS 44 for Blue.

If this option is not available the logo may also be displayed in four coloured EUROSкала (EUROSCALE) (Orange = 60M, 100Y, Blue = 100C, 50M).

The BW-Logo must not be altered, but remain isochromatic – 100% black.

Lettering:

The logo uses the font "ENGEL" , bold and medium.

The Mainline is versal bold and the Subline is versal medium.

Linespacing is 75 units (Adobe Illustrator).
